1. As a thanks for your support, accept this gift as a token of our appreciation.
2. The more complex the machine is, the harder it is for the operator to find the problem in the configuration.
3. The purpose of this test is to help you determine what major is best for you.
4. To survive we have to be more aware of our surroundings and put in more work.
5. The amount of scraping in the four tires can determine the evaluation of the gumming technique.
6. San Jose State University students who are in SJSU are blessed in terms of having a good education, and being able to get internships that set them up for their future careers.
7. Twenty to ten year olds have a remarkable mentality that differentiates them from the rest of the older generation, as many of them do not want jobs, instead they value a sense of purpose and how to make the world better. Anywhere they are they make a difference.
8. Blake Mycoski, is an amazing guy because has never aimed for personal success but focused on helping the less fortunate. Despite this and never completing a college degree, he found huge success by creating the TOMS shoe company which brought him great fortunes.
9. In recent years Nobel Peace Prize nominations may come in unexpected ways, and people are not in powerful leadership positions. For example the prize was awarded to Wangari Maathai, who is a woman from Kenya who Ph. D. in vet medicine and became a

professor and chair department. Then founding the Greenbelt Movement which trained African women who were uneducated, in poverty, and undervalued by their society to plant millions of trees that fought against desertification, control erosion and protected parks. Which provided better food sources and prevented wars as a result of planting trees..
